

Your Roadmap for Creating a Better Wireless Network

Reports show wireless and mobile traffic will exceed 63% of total IP traffic by 2021.¹ *Is your network prepared to address today's wireless challenges?*

Signs that it's time to re-approach your wireless model:

- You're interested in adopting a universal wireless network
- You're migrating from desktop to mobile devices
- You have a legacy wireless model
- You want to address security concerns
- You need to determine whether 802.1ax fits into your network

Let ConRes help with a **NO-COST** wireless assessment.*

WIRELESS READINESS ASSESSMENT

On-Site Data Collection

- On-site walk-through of physical location
- Heat maps of deficient or vulnerable areas within network
- Identification of unexpected WiFi access points and interference sources
- Radio frequency (RF) data collection and analysis
- Throughput analysis
- Assessment of user bases, devices, density and access points
- Identification of security/compliance requirements and assessment of current posture

Assessment Report

- Summary of assessment discoveries
- Detailed recommendations for optimization and improvement

WHO WE ARE

- IT solutions provider for Cloud, Collaboration, Data Center, Digital Infrastructure, and Cybersecurity
- Women-Owned, private family business
- 55+ years of customer dedication
- Highly skilled engineers with top-level certifications
- Global presence, local service

*Includes a 5,000 sq. ft. assessment and report.
