

AWS Launch Kit

Today, AWS has over 100 services, providing the tools you need to build a robust infrastructure, ensure your data is protected and secure, monitor all aspects of your operations, quickly respond to incidents, manage costs and more. We can help you migrate your application to the public cloud and operate with confidence.

Instead of implementing governance controls after you've blazed your first trails in the cloud, ConRes will help you create a framework with AWS best practices already in place.

Our AWS Solutions

Identity and Access Management

- Least privilege principle
- Centralize authentication

Costs

- Fine-grained cost analysis
- Proactive notification configuration
- Education about reserved instances & Enterprise Discount Program

Monitoring

- Centralize logging
- Integrate with third-party notification and remediation services

Security
