## Penelope the Privacy Penguin's tips on what not to share to **stay safe online**:

- **Your Home Address**

Watch out for clues to where you live like your mailbox or a street sign.

- **Your Full Name**

It's safer to use a shortened version or a nickname for your username.

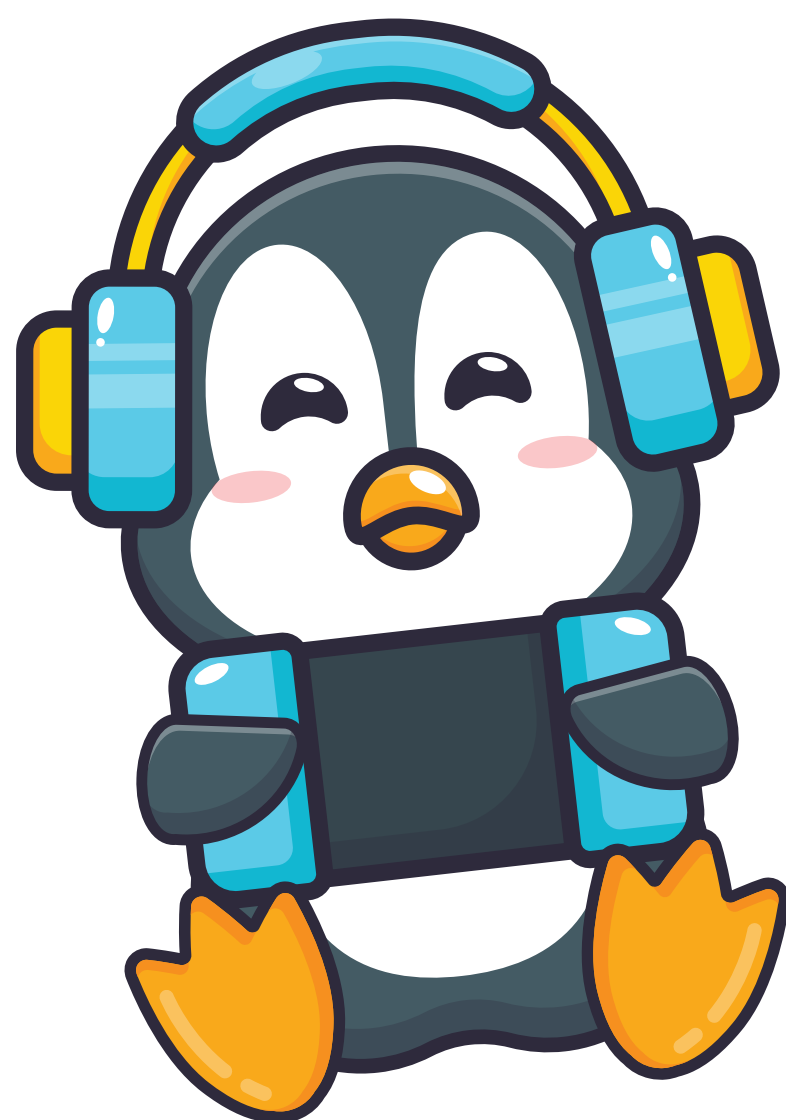

- **Your Full Birthday**

You can still celebrate your birthday but avoid sharing the year you were born or your age.

- **Your Phone Number**

Never publicly give away your phone number, it could be used to compromise your identity.

- **Your Netflix Password**

If you use that same password elsewhere, whoever sees it now has access to your personal information.

- **Your School Name or Location**

Avoid sharing identifiers like your school's location, the outside of the building or the logo.

- **Your Financial Information**

Never share information or documents related to your family's finances.
