# Staying Safe Online in Video

@ConRes ✓ 4-30

Be careful about the info you're sharing on #TikTok. #staysafeonline #onlinesafety.

## Penelope the Privacy Penguin's tips to stay safe online in video:

- **Set your account to private.**

If people want to follow, you should have the power to give them access to your content.

- **Only allow people you know to follow.**

We all know about stranger danger. Be careful of who you let follow you.

- **Be aware of what's in your background.**

Always check what's behind you so you don't accidentally share personal information.

- **Never show your home address.**

Make sure your video doesn't include things like your mailbox, the front of your house or a street sign.

- **Don't flash expensive things.**

Don't show off the latest hot item you just got. It could put you in danger if someone wants to take it.

- **Don't show where you go to school.**

Don't do things like tag your location, show your school or flash the logo on your varsity jacket.
