Unlock the Full Potential of the Cloud with ConRes

ConRes empowers businesses to seamlessly design, deploy, optimize and manage their cloud environments in AWS. Our end-to-end cloud services ensure that your organization can harness the full power of the cloud while we take care of the ongoing management and support—driving performance, scalability and cost efficiency.

- **Comprehensive Cloud Services**—Every business's cloud journey is unique. That's why our cloud services are designed to support you at every stage—from strategy to deployment and ongoing operations.

- **Cloud Strategy & Consulting**—Our experts collaborate with you to create a strategic cloud roadmap, providing insights on cloud adoption, migration strategies and cost-benefit analysis to align with your business goals.

- **Cloud Deployment & Migration**—Make cloud adoption seamless by efficiently moving your workloads, applications and data to AWS, minimizing downtime and disruption.

- **Managed Cloud Operations**—Ensure peak performance with 24/7 monitoring, incident management and performance optimization services, allowing you to focus on innovation, not infrastructure.

- **Security & Compliance**—Safeguard your cloud environment by implementing industry best practices and ensuring compliance, keeping your data secure and operations compliant.

- **Cost Optimization & FinOps**—Optimize your cloud spend with strategic resource management and billing structures. Our team ensures cost efficiency by helping you avoid wasteful spending and maximizing resource usage.

Customer Success (CX): Your Success is Our Priority

Successful cloud adoption goes beyond deployment—it requires continued support and guidance. Our Customer Success (CX) framework ensures you get the most from your cloud investment with:

- **Seamless Onboarding**—From day one, we align our services with your business objectives.
- **Adoption Support**—Maximize productivity and fully adopt cloud solutions.
- **Ongoing Cost Optimization**—Proactively implement strategies to control costs and optimize resources using ConRes Insights

Mid-Size Organizations and Key IT Challenges
- Employee Count: 200 – 5,000 employees
- Annual IT Spend: $2M – $20M
- Cloud & Infrastructure Budget: $250K – $3M per year
- Industry Focus: Healthcare, Financial Services, Manufacturing, Retail, and Technology
- Scaling cloud and hybrid IT environments efficiently
- Cost optimization and FinOps adoption
- IT procurement and vendor management
- Strengthening security and compliance in cloud environments

Decision-Makers:
- CIO, VP of IT, IT Director, Cloud/Infrastructure Manager

Simplified Cloud Billing

Managing cloud expenses can be complex, but ConRes Consolidated Billing streamlines your financial operations for ultimate clarity and control. With our service, you get:

- **Centralized Billing Management**—Consolidate multiple AWS accounts under a single payer model, providing simplified financial oversight.
- **Customized Invoices**—Gain clear visibility into costs broken down by department, project or region—giving you granular financial insights.

Flexible Professional Services with ConRes FlexPS

Modern business demands require agile support and expertise. ConRes FlexPS offers a modern approach to professional services that provides flexible access to expert resources, ensuring your cloud environment operates at peak performance.

Key benefits of FlexPS:

- **On-Demand Expertise**—Gain continuous access to specialized cloud architects and engineers.
- **Flexible Resource Scaling**—Adjust service usage as needed to meet evolving business demands.
- **Predictable Billing**—Transparent monthly invoicing for simplified financial planning.
- **Proactive Support**—Engage in regular check-ins to align your technology strategy with business goals.

What you get with FlexPS:

- **Dedicated Virtual Architect**—Receive tailored guidance from an assigned technology expert.
- **Direct Engineer Access**—Continuously access our expert engineers for ongoing technical support.
- **Strategic Check-Ins**—Regular account reviews to ensure technology is driving business growth.

Enhanced Visibility and Automation with CoreStack

Through our partnership with CoreStack, we provide advanced governance, automation and cost optimization capabilities. This means you get:

- **Automated Compliance Audits**—Ensure regulatory compliance with industry frameworks.
- **Cost Forecasting & Insights**—Leverage predictive analytics to manage costs and detect anomalies.
- **Cost Allocation & Tagging**—Gain granular visibility into cloud costs with tailored allocation tags.
- **Guided Remediation**—Identify and resolve security vulnerabilities and spend waste using CoreStack's intelligent insights.

Our Cloud Governance Delivery Model

Why choose ConRes?

Partnering with ConRes means gaining a dedicated cloud solution provider that is invested in your long-term success. From initial deployment to ongoing optimization, our team works alongside yours to drive cloud efficiency, cost savings and business outcomes.

Let us help you unlock the full potential of the cloud—so you can focus on what matters most: **growing your business.**
